

How to customize your wordpress login page

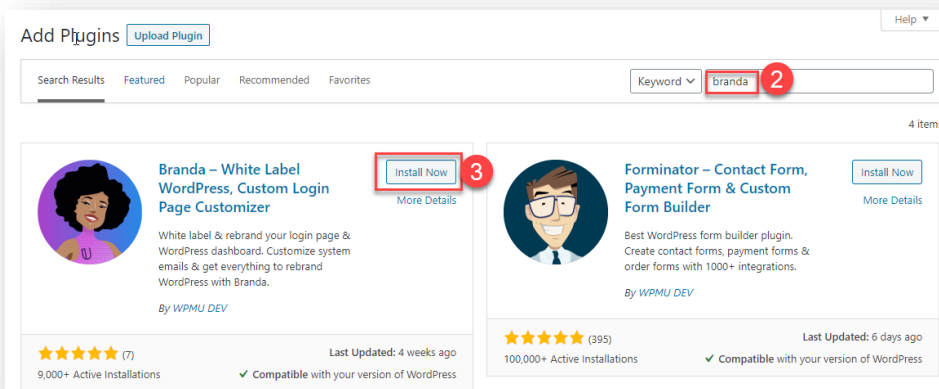

Wordpress offers a plugin to customize your login home page. This is a creative way of branding your entry point to the administrative dashboard to wordpress. By default the wordpress login page is not personalized to your website's branding.

The purpose of this guide is to customize your wordpress login page so that it no longer looks like the image below.

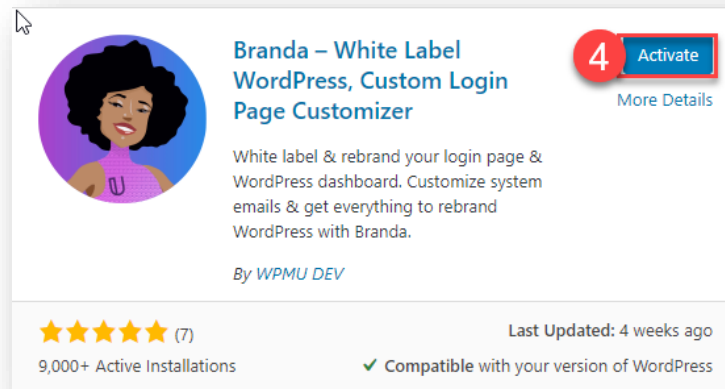

Customizing the wordpress Login Page

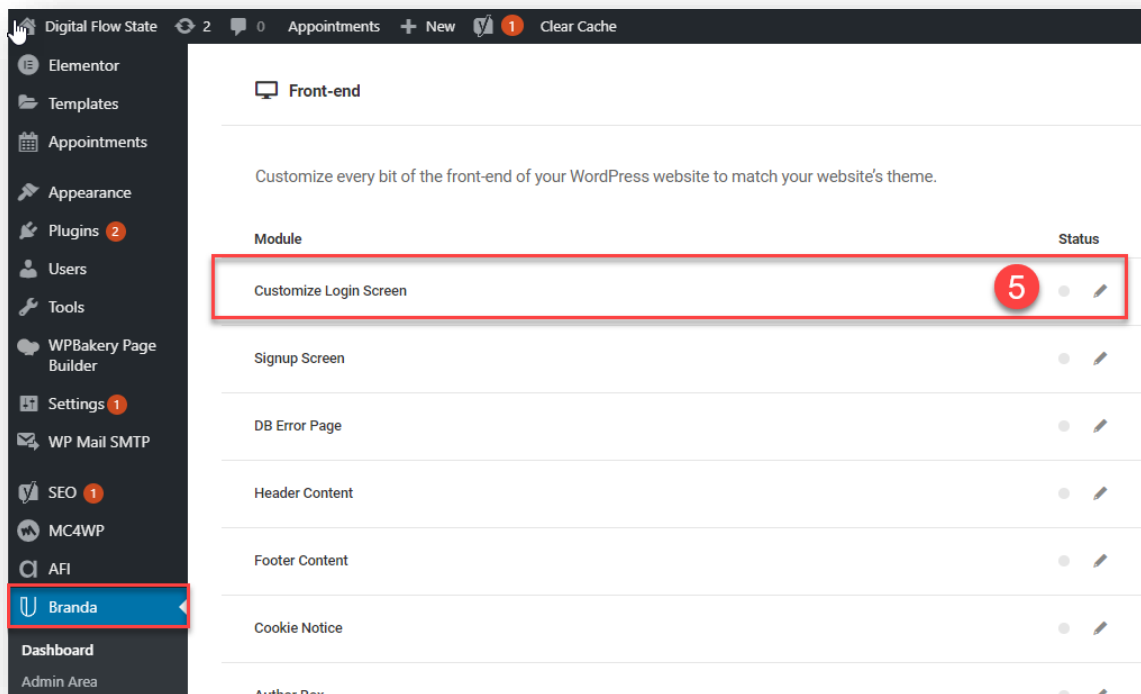

1. Navigate to the **Wordpress Plugin** download page.
2. Search for **Branda**.
3. Click **Install Now**.

4. Click **Activate** in the Branda wp plugin box.

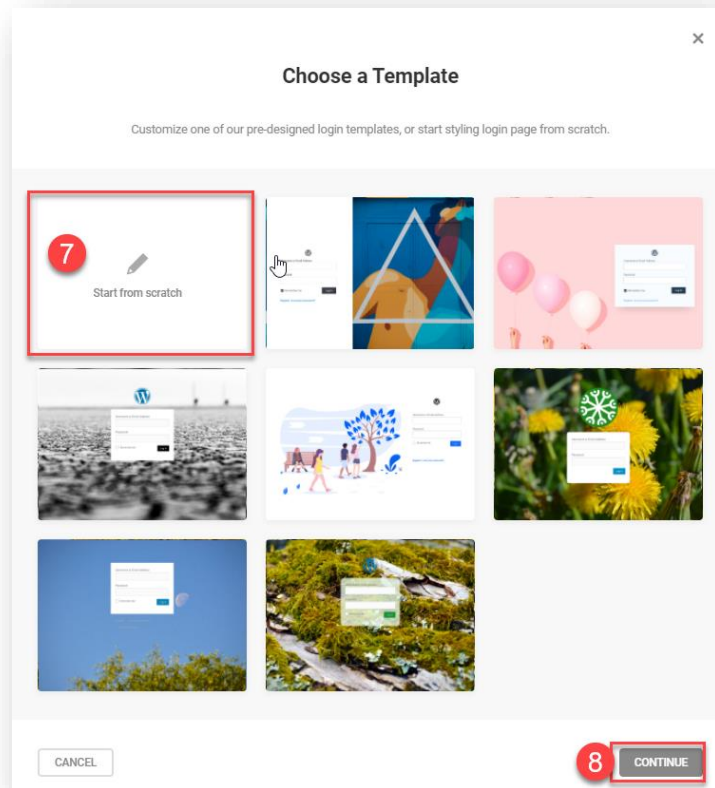

5. On your **Wordpress** side bar, Click **Branda** to access the **Customize Login Screen** option under the **Front-end** section.

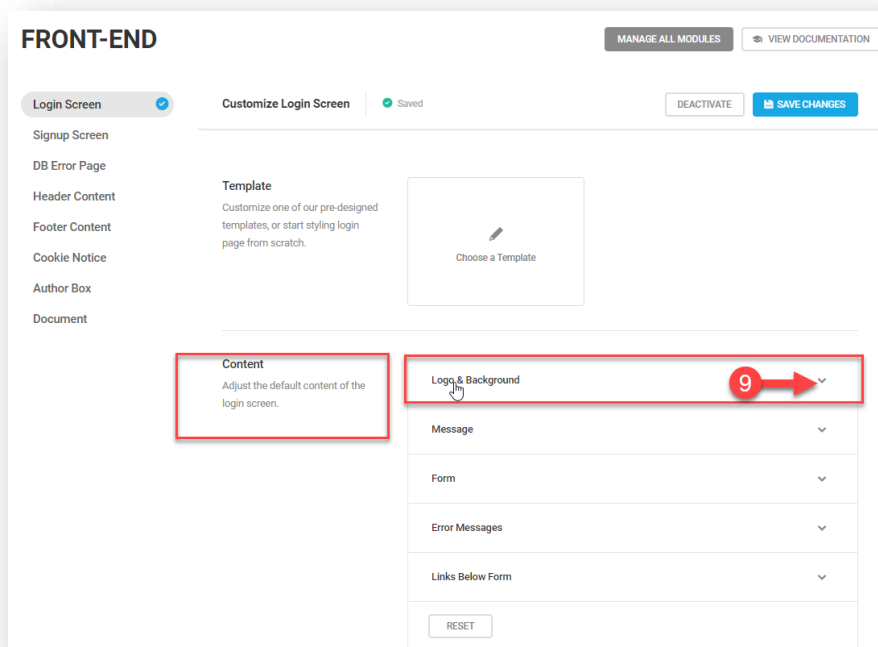

6. In the **Login Screen** table of content section click **ACTIVATE** under the **Customize Login Screen** section.

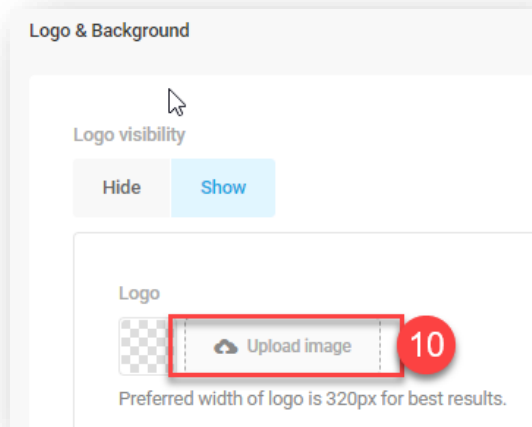

7. In the **Choose a Template** pop up window you can choose a pre existing template or **Start from scratch**. For this scenario we will click **Start from scratch**.
8. Click **CONTINUE**.

9. In the **Content** section expand the **Logo & Background** row by clicking the drop down arrow.

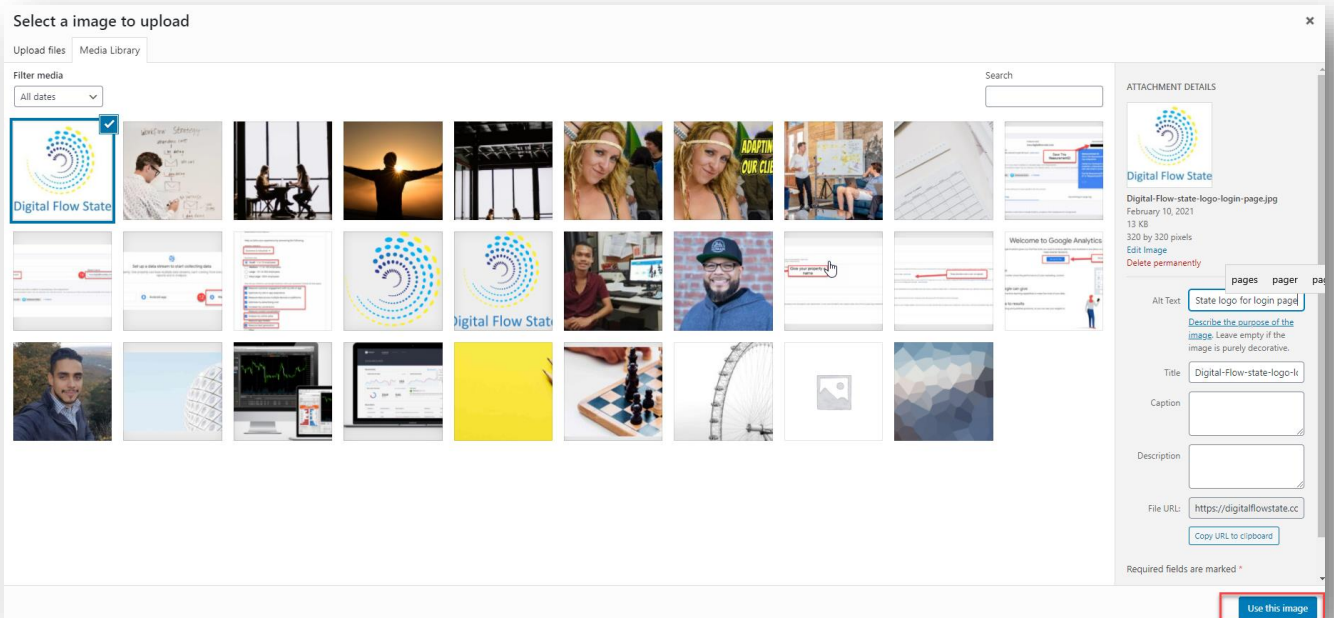

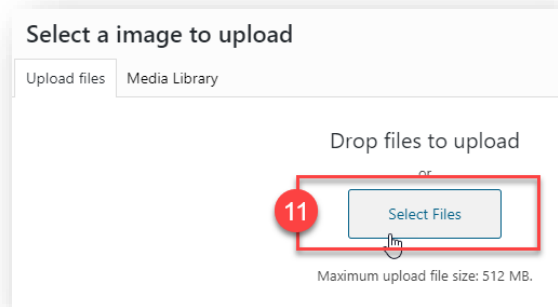

10. Add your logo by clicking the **Upload Image** button.

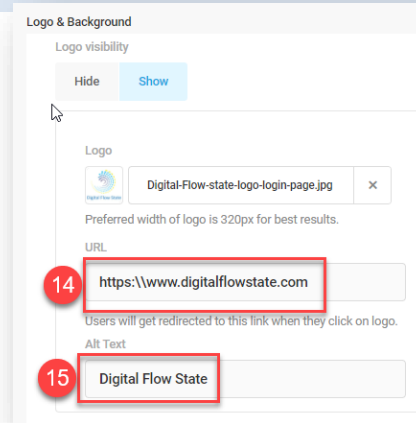

11. Click **Select Files** to search for your logo in your folder directory.

12. Search for your file in the folder directory and double click to upload to Wordpress.

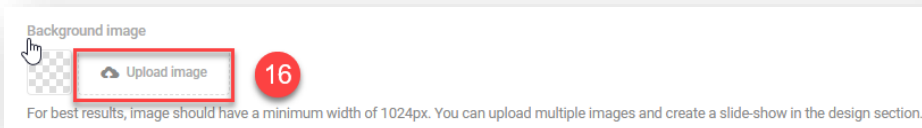

13. Once the image is uploaded click **Use this image**.

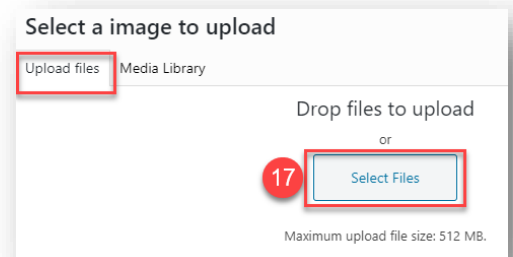

- 14. Update the **URL** field.
- 15. Update the **Alt Text** field.

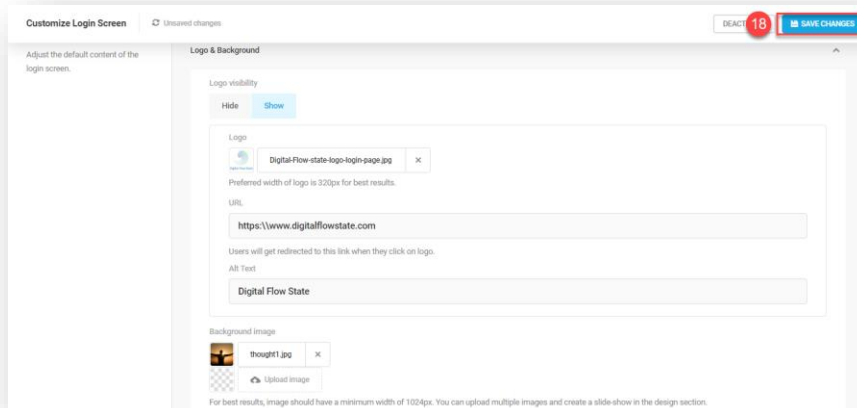

- 16. Navigate to the **Background Image** and click **Upload image**.

- 17. In the **Upload Files** tab click **Select Files** to search for your background image in the folder directory. Once you find your image double click it to import it to Wordpress.

- 18. Click **SAVE CHANGES**.

Check your work

19. Navigate to the user section in the wordpress main tool bar -> Hover over your name -> Click **Log Out**.
20. You should now be able to see your new login screen.
